## THE SOCIAL PREJUDICE

Which for so long restrained a great many people from taking advantage of our easy payment plan, has almost entirely disappeared, simply because of our courteous treatment and business like methods. No longer is one considered by his neighbors, financially unable to own and pay cash for nice furniture, because he avails himself of the opportunity to use his money for other things and pay us a little at a time.

## GOOD RECIPES

AMERICA'S UP-TO-DATE METHOD OF MAKING COFFEE.

Use a modern percolating coffee pot. Measure a heaping teaspoonful of medium ground Chicago Dairy coffee for each cup of cold water. Put the coffee into the filter cut, the cold water in the pot; place on the fire on a special lid that comes with these pots. In from 5 to 15 minutes the coffee is ready for use, according to the size of pot and amount of water to be heated. The automatic pump forces the water through the tube on to the coffee grounds, and it slowly percolates through the filter cup into the bottom of the pot. With Chicago Dairy coffee to start with, and fresh running water, it is impossible to spoil coffee, as there is no chance of over-boiling or of allowing the grounds to remain in the coffee too long. The coffee retains all the aroma and flavor, and as the flavor depend so much upon the aroma being preserved in the making, this is the main advantage of using a modern percolator.—Advertisement
